Notes:

Need to add how to order larger on the home page, also should add it to the contact page
If I have time, add a promotions tab on cookies and cakes.
Need to make it a bit more clear that it is your location and distance to the store.

I should make the send us an email text bigger, as well as maybe add some more images that look better.

Overall, I think that the user testers gave positive feedback. There were a few things that they mentioned that I did fix. I added how to contact us on the home page, and I also added that the distance was your distance from the store, instead of just distance from store. Additionally, I made the send us an email text bigger to make it easier to see. If I had more time, I would add a promotions dropdown on the cookies and cakes that went straight to the promotions, as well as more pictures on the cookies and cakes sections. I would also want to add an api for google maps instead of just using iframe, but I couldn't get it to work in time for the submission of the project. I would also add some more pictures of cookies since most of the pictures I have are cakes and cupcakes, not cookies.
